Introduction

If you can pull out your wallet license *right now*, then you already know why this *niche* PDF "call book" exists. It supports ham radio enthusiasts who suffer little-to-no internet bandwidth while chasing QSOs — or when the FCC takes down the ULS for (un)scheduled maintenance. Playground Amateur Radio Club [updates it roughly every other month](#) in February, April, June, August, October, and December. Please write to [this email address](#) with any comments or suggestions!

Daily & Weekly Transaction Files

 Effective Friday, July 17, 2026 from 6:00 PM to Monday, July 20, 8:00 AM: ULS, ASR and TCNS Systems Down for Scheduled Maintenance

Continuing the callbook tradition

This PDF "Call Book" pays homage to the foundational directories of the 1920s when the Dept. of Commerce and the iconic [Flying Horse Radio Amateur Callbook](#) helped operators find each other for almost eighty years. Ye Olde typesetting machines have given way to [Python scripts](#) & [FCC databases](#), yet the core mission endures:

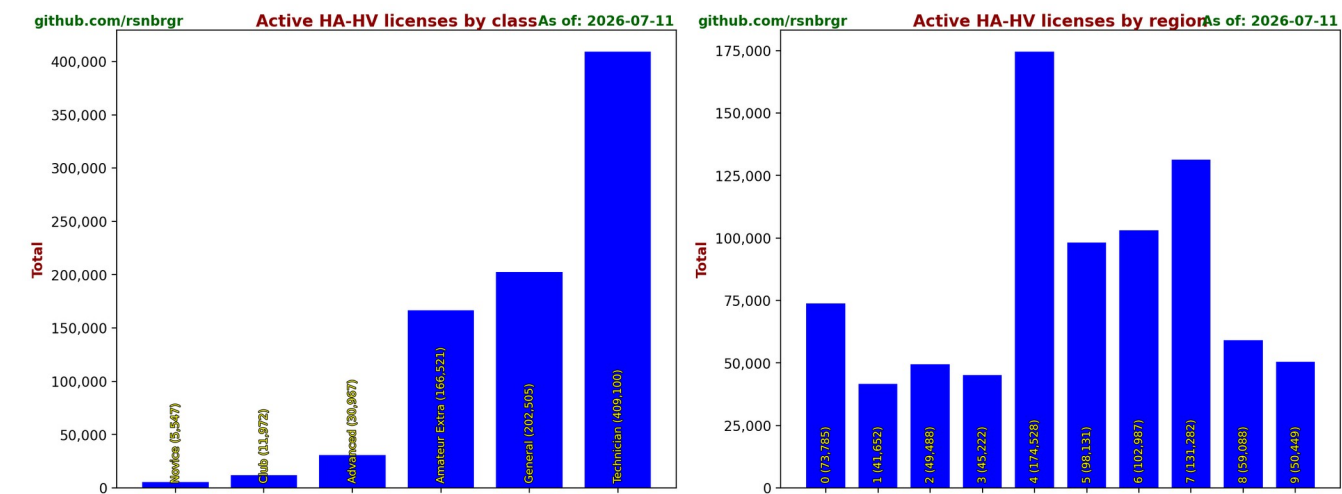

"Helping the amateur radio community to connect, share information, and advance the craft." Cue the Victrola and fire up that beautiful Collins! Happy hunting...

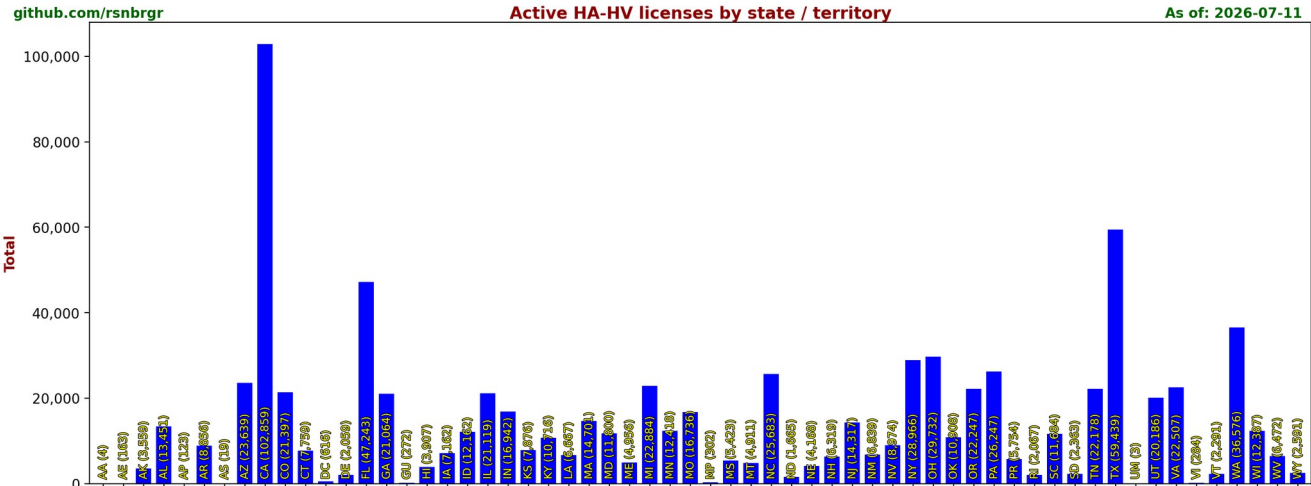

Errors in the FCC ULS

We make **NO corrections** to the raw FCC ULS dataset — because every licensee bears a responsibility to give the FCC correct information. Some call signs *do* appear in the wrong city or state, *e.g.* one CA resident who specified "[UM](#)" for the minor Pacific islands.
